(54) Title: APPARATUS AND METHOD FOR IMPROVING RELIABILITY OF COLLECTED SENSOR DATA OVER A NETWORK

(57) Abstract: Apparatus and method suitable for improving reliability of collected sensor data over a network. One or more transient errors are predicted and corrected using correlation of corrected data. For example, sensor data can be collected from one or more sensor nodes in a network. A device other than a sensor node can use the data to develop a predictive model based upon inherent redundancy in the sensor data, and correct one or more later-received values deemed unreliable.
